

Question 410) - How is Zakah on buffaloes calculated?

A: There is no difference between calculation on cattle and buffaloes.*

*97 Al-Bahr or-Raiq: The tern Baqar encompasses both cattle and buffalo. They are of the same species. They added together to reach Nisab, Zakah is then wajib on them. If they are mixed then the Zakah is paid in the form of whichever animal is more. If they are equal then take the least of the best species and the best of the least species." (232/2)
