

Performing Salaah on a Floor Plastered with Dung

Q: Salaah-107: I work for the government and have to travel from village to village. There are areas where the floors of the Masjid and people's homes are plastered with dung. Can a Musalla be spread on such a floor and salaah performed there?

Answer: There is no harm in spreading out a clean sheet on a floor plastered with dung and then performing salaah there. The salaah will be valid.
